

SIGNAL ASPECTS LTD

LED 'Theatre' Route Indicators

A variety of designs are available for illuminated route indication. They can be used in conjunction with mechanical or colour light signals, or even by themselves.

Features

- Route indication by high intensity white LED matrix
- LEDs rated at 100,000 hours
- No maintenance required
- Can be operated from a variety of voltages

Operation

The route indications are displayed by means of high intensity LEDs. The effective viewing angle is approximately 30 degrees. Depending on the indications to be shown the various figures or letters may be formed using dedicated LEDs for each figure, or by sharing LEDs that are switched by means of an internal relay.

A tinted screen prevents the unlit LEDs from being seen. An integral hood is provided.

Several models are available. Please contact Signal Aspects Ltd to discuss your requirement.

Every effort has been made to ensure that the information presented in this document is correct. Signal Aspects Ltd reserves the right to change any part of the specification without notice.
